DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-48 and 63-67 are drawn to a database interface, classified in class 707, subclass 3.
 - II. Claims 49-62 are drawn to data display, classified in class 345, subclass 655.
2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable.

In the instant case invention I (database interface) has separate utility such as a user interface in an interfacing environment. Invention II (data display) has separate utility such as with any other display system.
3. Because these inventions are distinct and search Groups I and II are not required to be simultaneous, restriction for examination purposes as indicated is proper.

A telephone call was made to Shawn W. Fraser on February 4, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
